

Application No. 10/761,162
Amendment dated 8/3/05
Reply to Office Action of 5/3/05

Amendments to the Specification

Please replace paragraph no. 0032 beginning on page 6 with the following rewritten paragraph:

[0032] Reference is briefly made to Figure 5, which illustrates a further alternate of the invention. In this alternative the bridge 52 is secured to ~~[[the]]~~ plate 30a utilizing a plurality of rivets 100. As can be seen the grooves 40, 41 have been removed and the bridge 52 no longer includes the hooks 56. In this embodiment the legs 53 and 54 each include an outgoing flange 102 through which a rivet 100 is received. Bolt 110a is shown relative to plate 30a. The hexagonally shaped cavity 130 has been replaced with a circular cavity 130a.
